

ARCHES & CORBELS

The Simply Elegant range includes a small selection of arches which are designed to be married with pilasters, corbels and columns from elsewhere in our range. Each of the designs featured has delightfully clean lines which allow them to be positioned in most areas regardless of architectural decoration.

Our largest arch has a span of almost four metres and is ideal for wide entrance halls or to help create the impression of a special area in a larger room. The smallest arch within the range, with a span of just under one metre, can be used in place of, or above, any doorway, or as part of a series of arches within a corridor.
